

JONED Enterprise UX Vision Pack v1

Unified visual direction for the public site, customer portal, driver portal, operations center, executive dashboard, administration, and mobile experience.

From company website to logistics platform

One visual system. Multiple roles. Clear separation between public experience and operational environments.

Public website

Customer portal

Driver portal

Shared visual language across all experiences

Dark premium navigation, high-contrast CTAs, clear cards, maps, metrics, status color coding, and generous spacing.

Brand palette

Navy

Slate

Orange

Sand

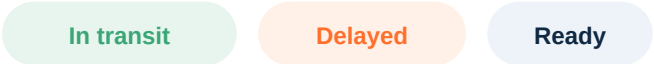

Cream

Interface rules

- Public site uses editorial sections, photography and trust strips.
- Operational products use white workspaces over dark/navy framing.
- Orange is action, not decoration.
- Maps, KPIs and statuses are first-class UI elements.

Status language

Customer confidence depends on immediate readability of shipment state, deadlines, issues, and next actions.

Public corporate website

A premium dark-header transport website with a strong hero, quote/tracking CTAs, coverage, services, recruiting, and contact.

JONED Enterprise UX Vision Pack v1

Driver portal

Mobile-first operational workspace for route tasks, check-in, vehicle inspection, image upload, signatures, and driver communication.

Today's route

Check-in and departure

Vehicle inspection

Photo and POD upload

Driver workflow

Assigned

Checked in

At pickup

Every route presents a finite checklist: arrive, inspect, confirm load, upload evidence, complete handoff, and report exceptions.

Exception center

Damages, delays, missing documents, vehicle issues, or customer notes.

Operations center

The dispatcher workspace combines live KPIs, active loads, fleet map, route exceptions, customer status, and operational response in one screen.

Executive and administration layers

Executive views simplify the network into KPIs, trends, utilization, and revenue health.
Administration controls identity, roles, audit, and integrations.

Executive dashboard

On-time rate

96%

Fleet utilization

87%

Revenue health

\$1.2M

The CEO should not see dispatcher noise. Executive surfaces summarize risk, trend, and performance across the business.

Administration

- Azure Entra ID sign-in
- User and role assignment
- Audit trail and activity history
- Configuration and integration switches
